HOW TO USE IT

You can use Pre•Mix™ as a transplant or starter fertilizer. Blend it into any soil or soilless substrate, or combine it with high-quality organic worm castings to add microbial life and fortify the nutritional value of your soil or planting mix.

APPLICATION

Keep the soil slightly warm at all times – if it's too cool, the microbial activity slows down, which makes it more difficult for the plants to grow. You also want to allow the soil to dry out between each watering. Because, as the All•Mix® substrate dries out, fresh air gets in, which helps the soil to breathe.

Water
 Regular watering

CAUTIONS AND WARNINGS

Keep out of the reach of children.
Do not swallow.
Use following the instructions.
