**WHAT IS ALL•MIX®?**

All•Mix® literally does it all for you – creating the optimum environment for plants to flourish throughout the year. This heavily pre-fertilized substrate mixture emulates a rich outdoor soil with a full micro active ecosystem. And it's been designed to have enough nutrient-fuelled power to sustain lush growth for a couple weeks, without any need to add any extra fertilizer.

**The pH and EC values**

Biobizz® products only contain natural organic elements rather than mineral salts such as magnesium or sulfates that you might find in synthetic fertilizers. This gives All•Mix® a high Electrical Conductivity (EC) value. And while its organic elements are impossible to measure, they do have a self-regulating system, which helps maintain the pH values at the correct level.

OUTDOOR	BLOOMING	

**HOW TO USE IT**

When using All•Mix® for the first time, moisten it with water and leave to stand for 36 hours.

**APPLICATION**

Keep the soil slightly warm at all times – if it's too cool, the microbial activity slows down, which makes it more difficult for the plants to grow. You also want to allow the soil to dry out between each watering. Because, as the All•Mix® substrate dries out, fresh air gets in, which helps the soil to breathe.
