

**CERTIFICATIONS**

**ACTIVATOR**

**WHAT IS ACTI-VERA™?**

Acti•Vera™ has been designed to protect the immune system, increase metabolism and enhance nutrient absorption in all sorts of plants.

**Bringing our plants for plants theory to life** Acti•Vera™ makes plants stronger and healthier, both inside and out. It protects and activates the immune system, increases germination and plant metabolism – breaking down sugars and enhancing nutrient absorption. It really

is a super, natural power product for plants – and it's 100% vegan.

The most important difference between our other Biobizz® products that are derived from the ground or sea and Acti•Vera™ is that this organic botanical activator comes 'out of a plant, for a plant'. Or to put it another catchy way – 'plants for plants'!

**FERTILIZER**

**WHAT IS BIO-BLOOM™?**

Hoping for exuberant flowers that lead to tasty fruits? Then this complete liquid organic fertilizer, as its name suggests, is what you need. It contains the optimum blend of nitrogen, phosphorous and potassium, along with enzymes and amino acids – all working together in perfect harmony with the soil. Trace elements and hormones of vegetable origin have also been added to help create a strong-stemmed and vigorous flowering plant.

**The nutrients in Bio•Bloom™**

Potassium and phosphorus help the buds, calyces and petals to form and grow. Potassium especially, works with the natural rhythm of the plant throughout the day and night which helps trigger the flowering process.

**CERTIFICATIONS**

**FERTILIZER**

**WHAT IS BIO-GROW®?**

You can apply this liquid growth fertilizer to most types of soil and substrate mixtures. It has 100% Dutch organic sugar beet extract at its base – commonly known as vinasse. This by-product of turning sugar beets or sugar cane into sugar is created by a natural fermentation process. Starches in the sugar are then treated with enzymes to produce glucose

that, along with other plant nutrients, help produce a rich food source for soil microbes, boosting their populations for a more productive soil.

The natural sugars and potassium in Bio-Grow® activate the bacterial flora in the substrate to guarantee you an ample harvest of deliciously sweet fruit.

**WHAT IS BIO•HEAVEN™?**

Your plants will look forward to complete, all-round nirvana with Bio•Heaven™. It contains carefully selected biological stimulants, such as amino acids – the basic building blocks for proteins and enzymes that are essential for the plant's structure and metabolism. It improves the effects and translocation of nutrients in all foliar sprays and fertiliser blends. It also gets rid of toxins through boosting the plant's anti-oxidant system and repairs chlorophyll production.

**The Bio•Heaven™ benefits**

Bio•Heaven™ stimulates enzymatic activity and fast nutrient absorption, while increasing the chelate of essential macro and micronutrients. Plants are also better able to retain moisture and experience less humidity stress as a result. Bio•Heaven™ also provides an outstanding source of carbonic acid for microorganisms in the soil. Ultimately, the crop performs better and you can look forward to a higher quality yield.

## WHAT IS CALMAG?

Biobizz **CALMAG** has been designed for the professional grower and the hobbyist that needs an extra of Calcium and Magnesium in their grow.

Ca and Mg are essential elements for proper plant growth and blooming, as they play a key role in cell production and photosynthesis. Ca/Mg deficiencies are common, as in today's world, we cannot rely on tap water to ensure correct mineral concentration.

## CA AND MG SUPPLEMENT

Either if you need to stick with soft tap water or go down the RO path, Biobizz Calmag brings you a 100% organic and certified solution for Ca/Mg deficiencies.

This product brings the best of our 100% natural ingredients and presents them in a formula that will not alter your preferred feeding regime.

Correct faulty water and deficiencies in an easy, controlled, and natural way with Biobizz Calmag.

## WHAT IS FISH•MIX™?

This rich infusion of organic fish emulsion from the North Sea, mixed together with extract of Dutch sugar beet helps accelerate the growth of all living organisms in the substrate. It also stimulates the production of microorganisms and useful bacteria in all types of soil and coco-based substrates. And it's good to know that, in keeping

with our strict organic farming requirements, Fish•Mix™ is not extracted with acids or stabilised with BHT (butylated hydroxytoluene) – a synthetic preservative. Even after a few days of use, it will have transformed poor quality earth into rich, fat soil – full of the natural minerals your plants are hungry for.

**CERTIFICATIONS**

**WHAT IS LEAF•COAT™?**

Leaf•Coat™ is a ready-to-use product that strengthens and protects plants against unwanted insects and damaging leaf fungi. Made from natural latex that was originally developed to prevent evaporation, it creates a permeable, self-degradable barrier on the leaf, which still allows air and light to get through.

**Why Leaf•Coat™ offers better protection in all conditions**

If the atmosphere gets too hot and humid (over 28°C), Leaf•Coat™ helps prevent the plant from losing too much water through evaporation. At the same time, the natural latex layer it forms around the leaves, helps the

**STRENGTHENER**

plant breath and stops it from 'sweating'. Then when the temperature drops, such as in winter months, Leaf•Coat™ safeguards against the cold by helping maintain the leaf temperature.

As an environmentally friendly alternative to pesticides, Leaf•Coat™ couldn't be more suitable or safer to use. Reducing the need to use pesticides also saves money. And unlike synthetic and toxic products it has a pleasant smell, and doesn't irritate. Because Leaf•Coat™ doesn't get absorbed by the leaves, it doesn't affect the taste of the fruit either.

**BOTTLES**

250ML, 500ML, 1L, 5L, 10L, 20L

SETTING	PHASE	FUNCTION
 INDOOR	 GROWING	 PREVENTING
 OUTDOOR	 BLOOMING	

**HOW TO USE IT**

There's no need to mix Leaf•Coat™ with water – simply apply straight from the bottle, preferably from an atomiser. Spray the leaves and flowers completely, and repeat this about two times a week until a fortnight before the end of the flowering period. Within a few hours of application, a very thin elastic layer – 1.5 microns thick – forms on the leaves. Its beneficial effects last for up to two weeks until it is naturally decomposed by light or sunlight.

**WHAT IS ROOT•JUICE™?**

Made entirely from vegetable ingredients and designed for organic gardening, Root•Juice™ combines two amazing natural substances: premium humic acid and seaweed. It's specially formulated to encourage vigorous root development and enhance the natural biological life that surrounds and supports your plant's root system.

Right from the start, Root•Juice™ helps with the initial roots stage as well as the growth of plants that have already rooted. This ensures the plant is better prepared to absorb nutrients more quickly – resulting in a strong, resilient crop and a guaranteed good harvest for all plant breeders.

**HOW TO USE IT**

If you're using All•Mix® or Light•Mix® substrates, it's best to feed plants during the first week(s) with Root•Juice™ as this is the crucial time period for healthy rooting. Root•Juice™ is ideal for adding to soil, peat and coco mixes, as well as providing guaranteed root protection with hydroponic or aeroponic systems.

## WHAT IS TOP-MAX™?

This 100% organic flowering strengthener contains ingredients that can help increase the actual size and weight of the flower clusters. Nutrient uptake is improved. And plants grown result in sweeter, smooth tasting crops. How it activates the flow of nutrients is essentially down to how it's able to free up the minerals calcium, iron and magnesium in the soil, which stimulate the plant's metabolism

### The benefits of humic and fulvic acids in Top•Max™

Top•Max™ is incredibly effective because of the humic acids it contains.

The main source of these is the ancient substance Leonardite.

Fulvic acids also possess particular properties that contribute to healthy floral growth. These acids are taken from exceptionally rich sources of humate deposits found deep within the earth. Their natural electrical charge attracts nutrients and minerals present in both the microbiological soil base and applied organic fertilizers. Humic and fulvic acids work together to boost the energy in old plant cells while stimulating new ones to form!
